

Rake up leaves to prevent flooding!

Any leaves that are left on the pavement can clog storm drains and flood your neighborhood.

To prevent flooding (and reduce water pollution*):

- Rake your leaves and grass clippings away from the road, sidewalk, driveway and wetlands.
- Bag the leaves and grass clippings for town pickup (or drop the bags off at your town dump) - or -
- Compost your leaves and grass clippings and use it as free fertilizer - or -
- Mow your leaves with a mulching mower and let them stay them on the lawn as a natural fertilizer.

*When leaves and grass clippings get washed into storm drains, their phosphorous can pollute local waterways. Learn more at YourCleanWater.org
